SUMMARY

Product designer with 7+ years of experience across B2B SaaS and digital products. I specialize in complex workflows, information architecture, and end-to-end product design - from discovery and prototyping through shipped UI. Strong at 0 to 1 products, cross-functional collaboration, and aligning design decisions with growth and business outcomes.

EXPERIENCE

BuildClock

Senior Product Designer

Part-time | Remote | Dec 2024 - Present

- Lead product design for a startup field time-tracking platform serving Canadian contractors (GPS clock-in, approvals, billing-ready exports).
- Defined dual-persona experiences for field workers and admins; scoped an MVP and partnered with engineering to ship the live product.
- Prioritized mobile-web adoption and week-close workflows over feature depth for real field SaaS constraints.

Mattali Drywall Inc.

Product Experience & Growth Strategist

Full-time | Hybrid | Aug 2023 - Present

- Own product experience and growth strategy across digital touchpoints to help attract, convert, and retain customers.
- Translate operational and sales needs into clearer journeys, messaging, and product opportunities.
- Partner with stakeholders to prioritize initiatives that improve customer experience and measurable growth.

Yethos

Product Designer

Part-time | Remote | Jul 2021 - Jul 2023

- Redesigned community discovery so users can evaluate relevance, activity, and trust before joining.
- Improved information architecture, activity signals, and conversation-first layouts validated through usability testing.

Leaf

Product Designer

Part-time | Remote | Jan 2019 - Jun 2021

- Designed HR management experiences for large corporate teams, with Team Network Health as a key differentiator.
- Structured team creation, communication, and manager insights around employee feedback signals.

Upsigns Digital Communication

Senior Product Designer

Full-time | Apr 2019 - Jul 2023

- Led UX/UI for digital products and client platforms from research and flows through high-fidelity design and design QA.
- Built and extended interface systems for consistency, faster delivery, and clearer collaboration with engineering.
- Facilitated discovery, prototyping, and stakeholder alignment to ship user-centered solutions under delivery constraints.

SELECTED WORK

- BuildClock - Field time tracking for Canadian contractors (B2B SaaS, 0 to 1, mobile web).
- Yethos - Community discovery and engagement redesign (research, IA, prototyping).
- Leaf - HR platform and Team Network Health dashboards for large teams.
