SUMMARY

Product designer with 7+ years crafting B2B SaaS and digital product experiences. I specialize in complex workflows, information architecture, and end-to-end product design - from discovery and prototyping through shipped UI. Comfortable owning 0 to 1 products, partnering with engineering, and aligning design decisions to growth and business outcomes.

EXPERIENCE

BuildClock

Senior Product Designer

Startup | Remote | Part-time | Dec 2024 - Present

- Lead product design for a field time-tracking platform for Canadian contractors (GPS clock-in, approvals, billing-ready exports).
- Defined dual-persona experience for field workers and admins; scoped a ruthless MVP and partnered with engineering to ship live product.
- Prioritized mobile-web adoption, week-close workflows, and clarity over feature depth for field SaaS realities.

Mattali Drywall Inc.

Product Experience & Growth Strategist

Full-time | Hybrid | Aug 2023 - Present

- Own product experience and growth strategy across digital touchpoints, helping the business attract, convert, and retain customers.
- Translate operational and sales needs into clear journeys, messaging, and product opportunities.
- Partner with stakeholders to prioritize initiatives that improve customer experience and measurable growth.

Yethos

Product Designer

Remote | Part-time | Jul 2021 - Jul 2023

- Redesigned community discovery so users can evaluate relevance, activity, and trust before joining.
- Improved information architecture, activity signals, and conversation-first layouts validated through usability testing.

Leaf

Product Designer

Remote | Part-time | Jan 2019 - Jun 2021

- Designed HR management experiences for large corporate teams, including Team Network Health as a product differentiator.
- Created structure for team creation, communication, and manager insights grounded in employee feedback signals.

Upsigns Digital Communication

Senior Product Designer

Full-time | Apr 2019 - Jul 2023

- Led UX/UI for digital products and client platforms, from research and flows through high-fidelity design and design QA.
- Built and extended interface systems for consistency, faster delivery, and clearer collaboration with engineering.
- Facilitated discovery, prototyping, and stakeholder alignment to ship user-centered solutions under real delivery constraints.

SELECTED WORK

- BuildClock - Field time tracking for Canadian contractors (B2B SaaS, 0 to 1, mobile web).
- Yethos - Community discovery and engagement redesign (research, IA, prototyping).
- Leaf - HR platform and Team Network Health dashboards for large teams.

SKILLS

Product Design | UX Research | Information Architecture | Interaction Design | UI Design | Design Systems | Prototyping | Usability Testing | Design QA | B2B SaaS | 0 to 1 Products | Cross-functional Collaboration
